The public experience does not accept private attachments and does not publish unapproved business rules as formal quotes or decisions. · SELF-SRC-PUBLIC-DATA-POLICY
- 先运行自有样例和资料完整性检查，再进入受控的 GPT 生产任务。
Start with the self-owned sample and material completeness check, then move into a governed GPT production task. · SELF-SRC-WORKFLOW

客户常见问题 / FAQ

这项服务最终交付什么？

What does the service actually deliver?

首期围绕同一份审核事实交付中英文销售页、PDF、可编辑 PPTX、FAQ、比较材料和规则型小工具。

The first release turns one approved fact set into bilingual sales pages, PDF, editable PPTX, FAQ, comparison materials, and rule-based tools.

会不会每个访客都重新调用 GPT？

Does every visitor trigger a new GPT call?

不会。GPT 用于生产阶段的理解与设计；审核后的结构由 server01 本机确定性渲染和执行。

No. GPT is used during production for understanding and design; approved structures are rendered and executed deterministically on server01.

资料缺失时会自动补齐吗？

Will missing facts be filled in automatically?

不会。缺失、冲突或未批准字段会被明确标成待确认，不能伪装成确定事实。

No. Missing, conflicting, or unapproved fields remain explicitly unresolved rather than being presented as facts.

是否保证被 ChatGPT 或搜索引擎推荐？

Does this guarantee recommendation by ChatGPT or search engines?

不保证。公开页面、连接检索、自然发现和外部引用是不同证据层，必须分别观察。

No. Public pages, connected retrieval, natural discovery, and external citation are separate evidence layers and are measured separately.

The self-owned sample demonstrates deterministic business deliverables from approved public facts. It does not prove third-party customer demand, conversion, revenue, search ranking, AI recommendation, or arbitrary app generation.
